SCHROEDER INDUSTRIES INTRODUCES

Bulk Diesel Cart and Skid

January 2012 | Leetsdale, PA

Leetsdale, PA - Schroeder Industries, a recognized leader in filtration and fluid conditioning products, introduces its Bulk Diesel Cart (BDC) and Bulk Diesel Skid (BDS).

With the introduction of tier four engine designs and Ultra Low Sulfur Diesel, bulk fuel quality and cleanliness have become critical factors in equipment service and maintenance programs. Schroeder Industries' new Bulk Diesel Cart (BDC) is designed for applications where large particulate, rust, water and scale from bulk fuel storage tanks is a concern. The Bulk Diesel Cart (BDC) is a mobile system comprised of a QCF Coalescing Filter, QL15 Particulate Filter, Number Two Bag Housing and 25 gpm Pump.

The Bulk Diesel Skid (BDS) is designed as a mobile system comprised of a QCF Coalescing Filter and QL15 Particulate Filter mounted to the cart. Schroeder's Bulk Diesel Skid (BDS) can deliver clean, dry fuel at 50 gpm.

Both systems are designed for single pass applications.

About Schroeder Industries

Schroeder Industries, an ISO 9001: 2008 certified company, designs, manufactures and markets filtration products for the hydraulic and lubrication, filter systems and process and fuels industries. Their expertise in filtration technology, superior filter and element technology capabilities, dedication to customer service and product support are the reasons Schroeder is a worldwide leader in Advanced Fluid Conditioning Solutions™.
