Our Quality Promise to You

Continuous Improvement In Our Business
To Ensure A Quality Product, Shipped On
Time, Without Compromise

Products

Hydraulic and Lube Filters

Filter Elements

Filter Systems

Fuel Filtration

Process Filters

Hydraulic Accessories

Electronics and IOT Integration

- Inline Filtration
- Mobile or Stationary Solutions
- Fluid Condition Monitoring

Filtration Solutions for Your Applications

Filtration solutions for an almost limitless range of applications.

Schroeder
INDUSTRIES

Manufactured in the United States

1 Leetsdale, Pennsylvania

2 Cumberland, Maryland

Headquartered in Leetsdale, Pennsylvania, Schroeder Industries manufactures our product on-site for quality control & assurance.

Schroeder's plant in Cumberland, Maryland manufactures our Element Technology.

PROUDLY MANUFACTURED IN THE UNITED STATES

Schroeder Brothers (founded in 1946)

- Established in 1946 as Schroeder Brothers Corporation
 - Celebrated 70 years in 2016
 - (A Mine Products Distribution Company)
- Incorporated as a division of Alco Industries in 1984
 - (A Mining Systems and Filtration Company)
- Became Schroeder Industries LLC in May 2003
 - (Advanced Fluid Conditioning Solutions®)
- Growth Rate
 - (As of 11/26/19): 212 Employees

FLUID POWER Face To Face Edited by Michael S. Weil

Schroeder Brothers Corporation found fluid power solutions for mechanical and electrical problems on mining equipment

In 1946, before the Schroeder Brothers Corp. was started, John Schroeder was the proprietor of an electrical apparatus sales agency which sold goods to coal mining operations in the Pittsburgh trading area. When Schroeder formed a partnership with his brothers Frank, William, and Reed in 1948, the Schroeder Brothers Corp. was born.

The new company continued to function as an agent and distributor of electrical apparatus to the coal mining industry, and also bought and sold war surplus mate-

draulic drill. Later, specialized power units were developed to operate drills in those mines that did not have existing hydraulic power sources.

But the drill did not catch on immediately. Problems arose during sales demonstrations. Even though the drill's design was good, the demonstrations depended on the condition of the machine's hydraulic system and varied from outstanding successes to complete disasters. Because the mine people could only measure results, John Schroeder had to find a way to

the drill would perform satisfactorily before committing it to demonstration. This is why Schroeder developed the portable hydraulic circuit tester.

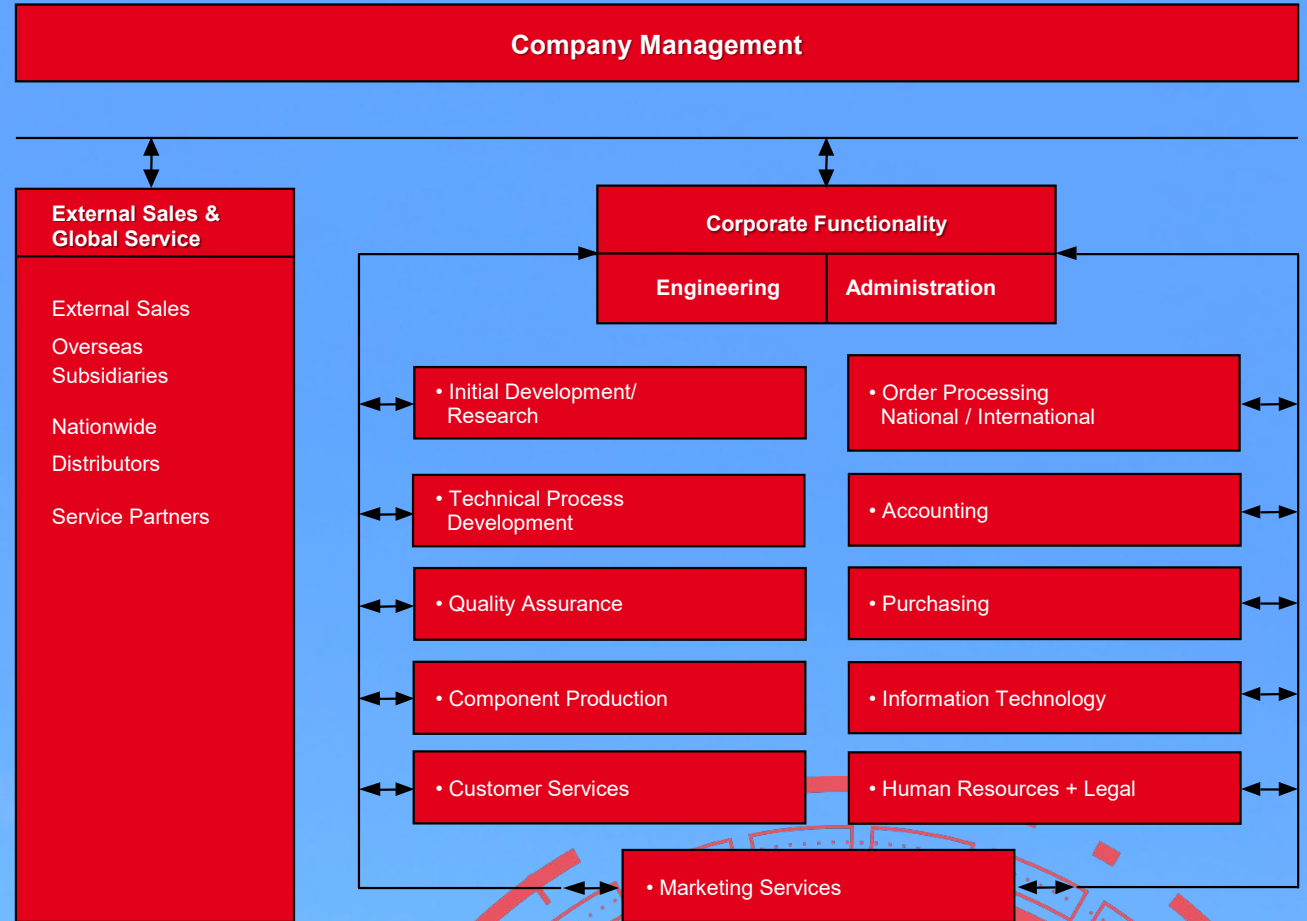

John Schroeder, with assistance from Don Stark* designed, built, and brought the circuit tester to market in 1954 and Schroeder Brothers Corp. began manufacturing its first fluid power product. Today, the concept of "on the line" testing with portable meters, pressure gages, and

Corp. became the Western Pennsylvania distributor for Fluid Controls, Rivett, L&L Mfg., Sui Hydraulics, and Oildyne. At the same time the company began to establish a nationwide distribution network to sell its own portable hydraulic circuit tester.

Schroeder's next manufacturing fluid power product was a maintenance test bench. Mine engineers were using Schroeder's circuit tester to identify faulty components in their circuits but they needed a way to control the quality of the equipment repair. They needed instrumentation of the circuit combined with the hydraulic test required to test repaired hydraulic

Organization of Schroeder Industries

Certifications

- NSF Certified (April 2017)
- ISO 9001:2015 Certified
- NIST SP171-800 Compliant
- Patented Technology
- UL Listed
- Registered Trademarks
- Annual Quality Audits
 - Insured for Cleanliness Quality

Patents

- Staff in all major liquid filtration disciplines & control technologies
- Over 40 U.S. Patent Awards since 1956
- Schroeder Industries was the first to introduce a hydraulic circuit tester and we continuously develop new products, such as hydraulic reservoirs, conditioning systems & element design technology
- 13 patents in the last 10 years alone, with 6 pending
- Average 12 new products launched per year with a 29% sales success within 2 months of launch & 93% success rate within 1 year

Custom Engineered Solutions

- On-site expert team of engineers, equipped to create custom filtration solutions to fit your individual needs
- Proactively develops products to support OEM and MRO demands and changes in Fluid Systems technology
- Product Design Review (PDR) Process – Efficient customization process to fill specific customer needs
- All new products are validated in the Engineering Lab per the most stringent applicable industry standards
- Through prototyping and testing, we are able to optimize designs and decrease costs to customers

Tank Optimization

- Global competition put strong pressure on OEMs:
 - Decreasing costs and increasing energy efficiency to be competitive as well as high requirements based on emission's directive
- Because of this, it is tough to install additional engine components in the already quite limited design space
- Our optimizing experts in the field of tank and filtration systems support you during the design engineering revision of your machine through:
 - Simulations, tests and experience
 - Optimized filter systems
 - Reduction of complexity of the tank
 - Optimization of space
 - Spare part management

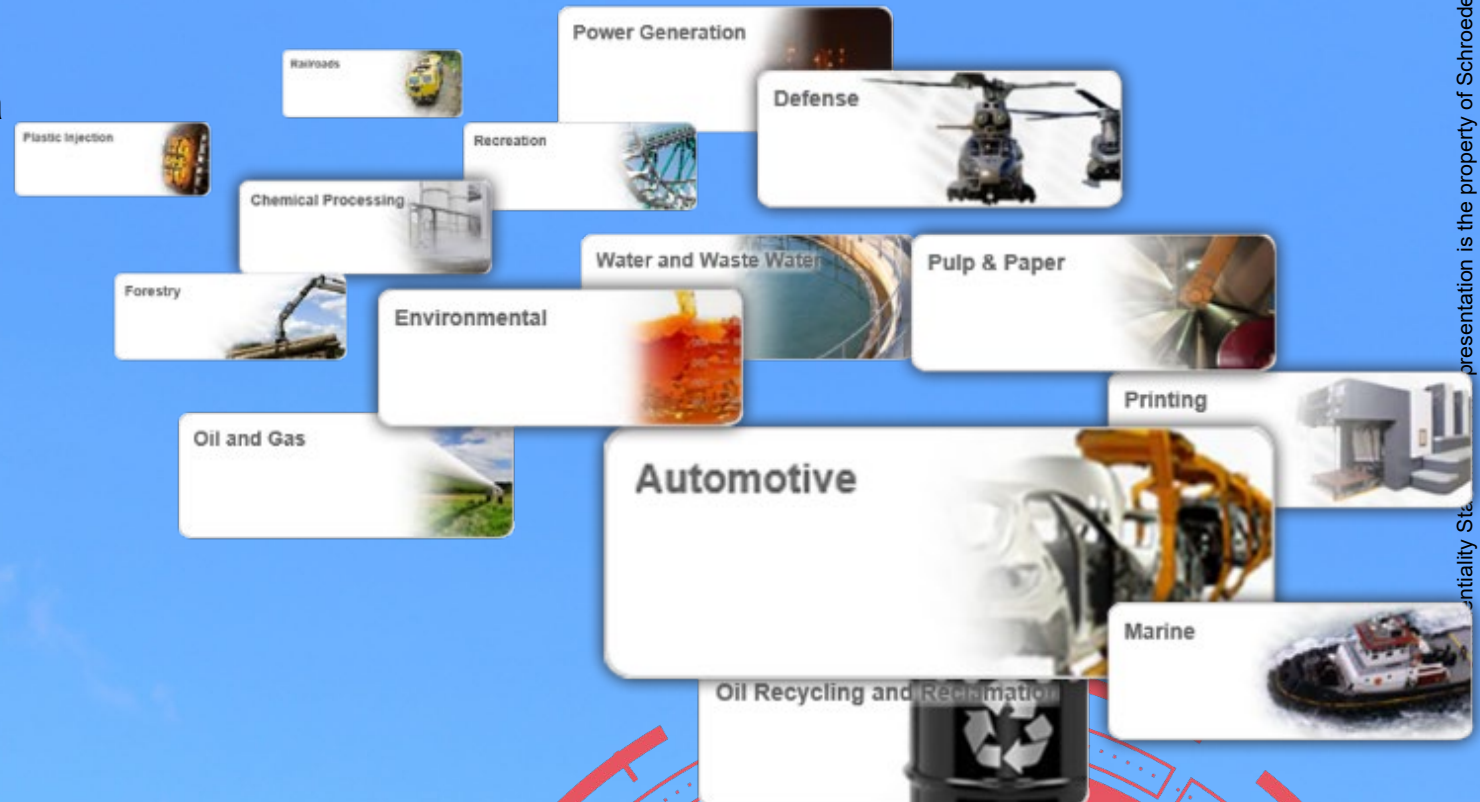

Private Labeling – Your Brand On Us

- Our Elements, Spin-Ons and Air Breathers all come with the option of Private Label Branding:
 - Your brand identity logo on a high-performing filtration solution from Schroeder Industries
- Our team of engineering and marketing experts are available to work within your Corporate Standards to ensure the highest quality artwork on the highest quality piece of filtration

Markets

Schroeder Industries is an industry leader in Advanced Fluid Conditioning Solutions® for a number of markets.
