

## For Immediate Release

### SCHROEDER INDUSTRIES INTRODUCES **Asset Management Filtration Station®**

August 2012 | Leetsdale, PA

Leetsdale, PA - Schroeder Industries, a recognized leader in filtration and fluid conditioning products, introduces its Asset Management Filtration Station® (AMFS).

Schroeder's new state-of-the-art Asset Management Filtration Station® provides ultra-efficient, cost-effective filtration with complete fluid quality monitoring, tracking and reporting capability via Schroeder's enhanced Asset Management software program, in one unit.

The AMFS is equipped with an on-board PC and controller that logs all of the data, while flushing, filtering and monitoring to ISO cleanliness all at the same time. The data is summarized into a simple Microsoft® Excel report tracked by the equipment ID number for easy import into most maintenance programs. Schroeder's AMFS is completely automatic, and can be programmed to run until the desired cleanliness codes are achieved. The touch screen display provides real-time graphics for easy monitoring of the filtering progress.

### About Schroeder Industries

Schroeder Industries, an ISO 9001: 2008 certified company, designs, manufactures and markets filtration products for the hydraulic and lubrication, filter systems and process and fuel industries. Their expertise in filtration technology, superior filter and element technology capabilities, dedication to customer service and product support are the reasons Schroeder is a worldwide leader in Advanced Fluid Conditioning Solutions™.
