### **SCHROEDER BIOFUELS LAUNCHES COLDCLEAR™**

**Leetsdale, PA** – Schroeder Biofuels, a recognized leader in filtration and separations products for the biodiesel industry, is pleased to announce the release of ColdClear™, the first multistage treatment system for solving the cold soak dilemma in biodiesel and biodiesel blends.

ColdClear™ is a new proprietary multi-stage separation technology designed specifically to ensure that biodiesel products conform to the new ASTM D6751 Standard for cold flow properties. ColdClear™ technology developed by Schroeder BioFuels is a multistage filtration/adsorption system that ensures that any potential factors that would initiate crystallization or plugging are dramatically reduced. ColdClear™ is effective for B100 and a range of diesel blends meaning that producers, distributors, or even fleet consumers of biodiesel blends can use it.

The technology is designed to be a single pass three-stage bank of cartridge based filters/adsorbers that sequentially remove those compounds likely to cause filter plugging while touting a negligible process yield loss (unlike competing processes). The cartridges are disposable and easy to remove from the housings. The systems are skid-mounted and engineered to meet a flow rate of 5 GPM, with cartridges that can be changed in minutes, resulting in very little downtime between production runs.

ColdClear™ is only available through the Schroeder Biofuels network of authorized distributors and representatives. Schroeder BioFuels will be holding a webcast on ColdClear™ this Friday, May 15<sup>th</sup>, 2009 at 11:00 AM EDT. Please visit [www.schroederbiofuels.com](http://www.schroederbiofuels.com) information on joining this webcast.

#### **About Schroeder Industries**

Schroeder Industries designs, manufactures and markets filtration products for the hydraulic, biofuel and processing industries. Schroeder is a leader in filtration and fluid conditioning. Their expertise in filtration technology, superior filter and element manufacturing capabilities, dedication to customer service, and product support are the reasons Schroeder is considered “The Filter Company.”

For further information about Schroeder Industries and its products, call 724-318-1100 or visit [www.schroederbiofuels.com](http://www.schroederbiofuels.com).
