SCHROEDER INDUSTRIES PRESENTS A CUSTOMIZED MOBILE FILTRATION SYSTEM

Leetsdale, PA- Schroeder Industries, a recognized leader in filtration and fluid conditioning products, announces a customized Mobile Filtration System (part number MFS127Z01B07G2102), a compact, self-contained hydraulic filtration system designed to maintain Waste Management Inc.'s 18/15/13 target hydraulic cleanliness level specification. The MFS cart is equipped with high efficiency, high capacity elements capable of removing particulate contamination and water quickly, conveniently, and economically.

The customized MFS is designed for instant hook up to Waste Management's newest fleet trucks, and was selected by Waste Management Fleet Maintenance as their preferred portable hydraulic filter cart.

The system is ideal for a wide variety of applications, including high intensity filtering during routine maintenance, cleaning a hydraulic system following component replacement, filtering new hydraulic fluid, and transferring hydraulic fluid from storage tanks and drums to system reservoirs.

A modular base eliminates the need for hoses between components and minimizes leakage. The base-supported filter can be serviced from the top cap for easy maintenance, and comes equipped with a D5 Dirt Alarm® that indicates when the filter needs changing. The triple bowl filter length provides for maximum dirt holding capacity.

This customized cart includes special hoses and quick disconnect fittings along with an oil drip pan for easy cleanup. The included 7GPM pump helps make cleanup even faster. The filtration system comes equipped with a 115VAC, single phase ¾ Hp motor. Off-line stationary systems are also available.

About Schroeder Industries

Schroeder Industries designs, manufactures and markets filtration products for the fluid power industry. Schroeder is a leader in filtration and fluid conditioning. Their expertise in filtration technology, superior filter and element manufacturing capabilities, and dedication to customer service and product support are the reasons Schroeder is considered "The Filter Company."

For further information about Schroeder Industries and its products, call 724-318-1100 or visit www.schroederindustries.com.
