Filter/Tank Optimization Services

- Allows a Schroeder Optimization Expert to visit your site and discover any cost-savings, or increased machine efficiencies within your hydraulic tank
- Cost-effective options for working within current system, or by means of creating a brand new system, to give you increased de-aeration, and reservoir volume reduction

Manifolds with Integrated External & Internal Filtration

Series of cartridge filters, perfect for mounting directly in the manifold, also available.

- Gives operators total control of the fluid flow and directional efficiencies
- Options for consolidated, integrated components, such as filters, elements, sensors, and valves, on a high level manifold assembly
- Solution for streamlined, and reduced plumbing and routings to and from remote-mounted components

FS | Filtration Station®

- Hydraulic fluid filtration cart capable of flushing, monitoring, and documenting ISO cleanliness
- Designed to transfer fluid through two (2) K9 filters in series for staged particulate or water and particulate removal
- Included USB port allows the ISO code data to be downloaded for further processing and/or printing

HDP 600 BC1 | On-Board Diesel Coalescing Filter with Electric Pump

- On-board cartridge filter system designed to protect diesel powered equipment from failures, breakdowns, and frequent/unplanned service intervals
- Integral electrical priming pump, rated for continuous duty operation, allows for improved reliability of your equipment's fuel system
