Advanced Fluid Conditioning Solutions®

GRTB | 100 gpm, 100 psi

- GeoSeal® quality protection, keeps warranty costs down
- Drop-in-tank-mounted footprint for easy installation with OEM-selected connections
- Tank optimization using Schroeder's Air-in-Oil testing available for high quantity applications

YF30 | 25 gpm, 3000 psi

- All aluminum assembly
- Meets HF2 automotive standards
- Offered in straight thread porting
- Optional drain plug in bowl for easy servicing
- Available with non-bypass option (contact factory for more details)

CTF60 | 75 gpm, 6000 psi

- Available with non-bypass option with high collapse element
- Offered in pipe, SAW straight thread, flange and ISO 228 porting
- Thread on bowl with optional drain plug for easy element service

HS60 | 100 gpm, 6000 psi

- Full flow reverse flow check valve diverts flow past the element in hydrostatic applications
- Offered in pipe, SAW straight thread, flange and ISO 228 porting
- Thread on bowl with drain plug for easy element service
- Top-ported design, capable of handling 100 gpm flow
