

Hydraulic & Lube Filtration

For Immediate Release

SCHROEDER INDUSTRIES INTRODUCES

Tank-Mounted Filter | KFT

July 2013 | Leetsdale, PA

Leetsdale, PA - Schroeder Industries, a recognized leader in filtration and fluid conditioning products, re-releases the Tank-Mounted Filter | KFT, a low pressure filter featuring an updated manufacturing process.

Schroeder Industries KFT features a steel bowl with welded steel fittings. When ordered with the optional steel cap, it is the only steel K size tank mounted filter. The all-steel construction allows the KFT to be used in mining, marine and oil and gas applications where current safety regulations prevent the use of aluminum. The KFT is available with 1 to 4 ports ranging in size from 1/2 inch NPT or SAE-8 up to 2 inch NPT for SAE-32. With four standard porting locations the KFT offers superior plumbing flexibility. Currently the KFT is available in the single length K size housing. With outlet options as well as Dirt Alarm® options, the KFT is an incredibly versatile 100 gpm, 100 psi return line tank mounted filter.

KFT

About Schroeder Industries

Schroeder Industries, an ISO 9001: 2008 certified company, designs, manufactures and markets filtration products for the hydraulic and lubrication, filter systems, process and fuel industries. Their expertise in filtration technology, superior filter and element technology capabilities, dedication to customer service and product support are the reasons Schroeder is a worldwide leader in Advanced Fluid Conditioning Solutions™.
