

Mission, Vision, Values, Quality Policy

In operation since 1946, starting as a mining equipment manufacturer and reseller. Since then, the company has evolved to be a leading firm in the development and production of Fluid Conditioning Equipment. We design solutions for industry both OEM and MRO, Industrial and Mobile Equipment. From hydraulic fluids and low-viscosity fluids to process water and fuels. Our Partnerships provide Innovative products, processes and solutions to improve performance and efficiency in our customer equipment.

Mission

Our Mission

We believe lasting business success is a product of customer-driven innovation and sustained leadership in technological advancement of fluid conditioning products and services. This approach enables our people—our most valuable resource—to express creativity in solving the world's fluid conditioning problems, while delivering value, sales, and profits which benefit all of our stakeholders, the communities we operate in, and the environment
