

FILTRATION SOLUTIONS FOR PLASTIC INJECTION

Improved Reliability

Branded Solutions

Lower Maintenance Costs

MTS

Membrane Technology Systems | MTS

- ◆ An off-line filtration system that features unique membrane elements
- ◆ Constructed of stacked disks where dirt holding capacity is measured in pounds instead of grams.
- ◆ Provides excellent dirt removal efficiency, even with single pass filtration.
- ◆ Drastically reduces the amount of time required to clean up highly contaminated fluids.
- ◆ Flows available from 5 gpm (19 L/min) up to 20 gpm (76 L/min).

2K9

KLC

Kidney Loop Filtration | 2K9 and KLC

- ◆ Two patent-pending K9 filters supplied in series as a single filter assembly providing in-line singles pass particulate and water filtration
- ◆ Meets HF4 automotive standard
- ◆ 900 psi rating covers almost all transfer line pressure specs including air driven transfer systems
- ◆ Compact footprint allows for installations with tight space requirements
- ◆ Flow rates from 1.3 gpm - 4.9 gpm
- ◆ Fluids up to 10,000 SUS
- ◆ Single phase or 3 phase motor options available
- ◆ Dimicron elements with high dirt holding capacity

LSA

LSN

Lube Skids | LSN, LSW and LSA

- ◆ Easy accessibility and reconfiguring
- ◆ Optional air or water cooling heat exchangers available
- ◆ Multiple filtration options (FLND, LPF, LF)
- ◆ Built in clogging indicator
- ◆ AC Motors available in 208V, 230V, 460V, and 575V
- ◆ Flows available from 1.2 gpm (4.5 L/min) up to 45 gpm (170 L/min)
- ◆ Standard Viscosity range up to 1,000 SUS (220 cSt)

Schroeder Elements

Schroeder Bestfit® Element with Private Label Branding Available

- ◆ Affordable filtration solution that can be used in a wide variety of applications
- ◆ Cartridge and Spin-on styles available
- ◆ Variety of media grades (cellulose, synthetic, water removal, anti-stat)
- ◆ Available for private label branding
- ◆ Over 40,000 cross references on the website

RF4

Automatic Backflush Filter | RF4

- ◆ Self-cleaning, backflushing system for separating particles
- ◆ Ideal for filtering source water, back wash, or low viscosity fluid
- ◆ Continuous filtration even during backflushing
- ◆ Automatic backflushing capability reduces operating & maintenance costs
- ◆ Slotted tube filter elements available in 25 µm to 3000 µm

RF12

High Intensity Automatic Backflush Filter | RF12

- ◆ Energy-optimised filtration and back-flushing principle
- ◆ Independent of filtrate pressure
- ◆ Highly efficient back-flushing mechanism based on conical JetFlush-technology
- ◆ Separation of solid particles from low viscosity fluids
- ◆ Discontinuous filtration
- ◆ Filtration of coolants in low-pressure range
- ◆ Simple integration and flexible adaptation to the machine
- ◆ Maintenance-friendly design

NOF30

14CRZX

20CRZX

Sandwich Filter and Manifold Filtration | NOF30, 20CRZX and 14CRZX

- ◆ Allows for effective filtration in customer's manifold
- ◆ Cartridge filters are designed to be mounted directly in the manifold
- ◆ Withstands high pressure surges-3000 psi collapse rating

HS60

Top-Ported Pressure Filter | HS60

- ◆ High pressure filter with 6,000 psi (415 bar) operating pressure and up to 100 gpm (380 L/min) flow
- ◆ Top-ported design capable of handling 100 gpm flow
- ◆ Offered in SAE straight thread and flange porting
- ◆ Thread on bowl with drain plug for easy element service

Schroeder Industries, an ISO 9001:2008 certified company, focuses on developing filtration and fluid service products for plastic injection. We are proud of our proven track record of providing quality products over the last sixty years. The designs you see inside are the result of thousands of hours of field testing and laboratory research combined with decades of experience. Schroeder was one of the first companies to demonstrate the need for, and benefits of, hydraulic filtration. We pioneered the development of micronic filtration, helping to set performance standards in industrial fluid power systems. As a result, Schroeder is now a leader in filtration and fluid conditioning — and the proof of our expertise lies in our broad mix of unsurpassed products.

FILTRATION SOLUTIONS FOR PLASTIC INJECTION

L-4413 | 2015

Plastic Injection

We design solutions for the injection molding industry and for the success of our customers by:

- ◆ Optimizing the use of technology with applications for improved equipment performance
- ◆ Using an efficient, timely customization process to fill the specific needs of plastic injection
- ◆ Preserving our reputation for reliability and flexibility to meet the demands of plastic injection
- ◆ Expanding globally to support our customers and stay current with new technologies
- ◆ Leveraging and sharing our knowledge to meet challenges
- ◆ Nurturing a creative, cooperative culture committed to providing the best solutions for our customers

Our goal is to be your fluid conditioning partner. Our expertise in filtration technology, our superior filter and element manufacturing capabilities, and our dedication to customer service and product support are the reasons we're considered experts in Advanced Fluid Conditioning Solutions®.

We are committed to providing the best available filter products to meet necessary cleanliness levels at a competitive price. As a cost-effective quality producer, we can work with your organization to supply contamination control technology or develop long-range pricing programs that can improve your company's bottom line.
