

AMFS | Asset Management Filtration Station®

Features:

- Complete fluid management system to monitor fluid condition, filter out contaminants, and track data by asset name.
- Auto record-keeping, trending, and analysis of fluid with on-board PC.
- Ideal for managing multiple equipment assets.
- Automatically shuts down when the selected ISO cleanliness is reached.
- Dual, staged filters for both water and/or contaminated removal bypass valve allows cart to be used as a transfer cart.

Markets:

- Industrial
- Pulp & Paper
- Power Generation
- Mobile Vehicles
- Steel Making

Specifications:

- **Flow Rating:**
5 gpm (19 L/min)
- **Operating Temperature:**
-20°F to 150°F (-29°C to 65°C)
- **Viscosity:**
up to 1000 SUS (216 cSt)
- **Bypass Valve Setting Cracking:**
30 psi (2 bar) x 2
- **Compatibility:**
All petroleum-based hydraulic fluid compatible with Viton®.
- **Weight:**
200 lbs. (440 kg.) approx.
