

SCHROEDER INDUSTRIES

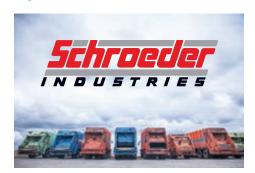

Introducing a FREE Fluid Auditing Service, Powered by Schroeder

As an ISO 9001:2015 Certified Company, the experts at Schroeder Industries know a thing or two about fluid cleanliness and how it relates to keeping fluid-powered machinery operating at the highest efficiency.

The BIG SECRET: keep individual hydraulic and fuel-system components operating AS IF THEY WERE NEW.

Schroeder's FREE Fluid Auditing Service will help you accomplish just that!

WHAT WILL HAPPEN: Our team of Fluid Engineering experts will come directly to your site, absolutely free-of-charge, and leave your facility with the tools and a plan for maintaining fluid cleanliness and overall system operations.

By scheduling a no charge, no-obligation "Fluid Audit" from Schroeder Industries, you can guarantee the following results and plan-of-action for your team moving forward:

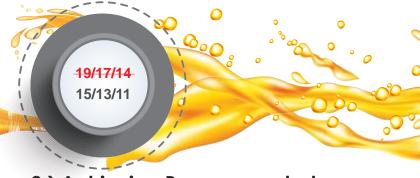

1.) Discovery of Current **Contamination Control Practices**

If you are experiencing a higher-than-normal increase in hydraulic component cost, this audit service is for you! Our experts will come to your site and perform a detailed analysis of your current contamination control practices.

PROUDLY MANUFACTURED IN THE UNITED STATES

2.) Achieving Recommended ISO Code Levels

During the Discovery stage, our experts will work with your team to determine the proper ISO Code for the specific equipment you are operating and develop a plan-ofaction to improve contamination levels in your fluid.*

*Note: In today's modern equipment, simply maintaining fluid cleanliness in hydraulic systems can reduce the cost of operation by as much as two-thirds.

AN AMERICAN LEADER IN FLUID ENGINEERII

Fluid Care Center (FCC)

Located in Leetsdale, PA, our FCC is your one-stop shop for your complete fluid evaluation and product development. This partnership also gets you:

- On-Site Fluid Quality Audits/Trainings
- Application Specific Testing
- ◆ Tests Commissioned for Customers that are ◆ Machines/Systems Optimized for Scientifically Supported & Documented
 - Specific Lubrication Applications
- Standard Housing/Element Testing
- Technical Cleanliness

FLUID AUDITING SERVICES

About Schroeder Industries - An American Leader in Fluid Engineering + Filtration

Schroeder Industries has been designing, manufacturing, and marketing a complete range of Advanced Fluid Conditioning Solutions® for over 73 years.

With products for diagnostic, as well as filtration tools, we have been recognized as the leader in the fluid conditioning industry for markets that use hydraulic oils, fuels and water.

Schroeder Industries' corporate headquarters is located in Leetsdale, PA, with manufacturing facilities at the Leetsdale location, as well as Cumberland, MD.

3.) Plan-of-Action to Reduce **Contamination-Related Downtime**

Once an ISO Code has been established, our experts will develop a plan-of-action to help achieve (and maintain) that cleanliness level. As the manufacturer of the industry's most reliable liquid filtration products, Schroeder makes the tools to help achieve and put in place an

Once the plan-of-action is established and agreed upon, our experts will help with the implemenation. We will work with your team on best practices and offer training and continuous industry support and knowledge.
