

Element Private Labeling

Private Label Capabilities at Schroeder Industries

Schroeder Industries offers a full line of branding solutions for air breathers, spin-ons, and replacement elements. Using the Element Private Label Form (L-2993), OEMs can obtain Schroeder elements with their very own custom logo (for Spin-on elements and air breathers, reference Spin-On and Air Breather Private Label Form (L-2994)). Schroeder has the ability to brand both individual and master cartons as requested. We can apply the customer name, part number, logo (black and white – .jpg file), and other customer texts. Bar coding and customer pre-printed boxes can also be requested (set up fees and minimum order quantities are required for customer pre-printed boxes).

Element Markings SI standard elements and DirtCatcher

Notes:

1. Only one end cap will be marked.
2. Standard Schroeder date code to be used, unless otherwise specified.
3. Logos can be laser etched (a. DXF file of the logo is required).

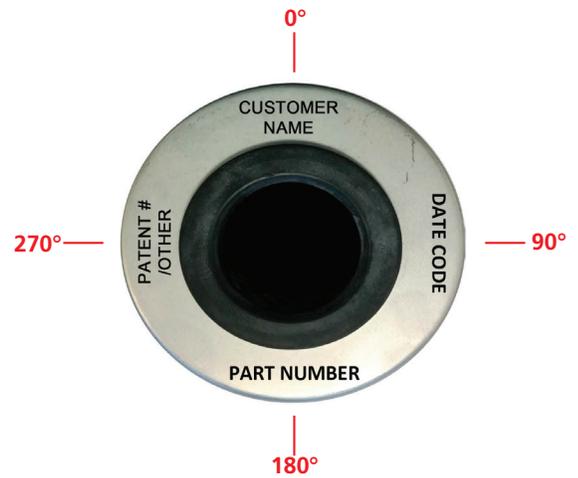

Perforated Plastic Outer Wraps

Perforated Metal Outer Wrap

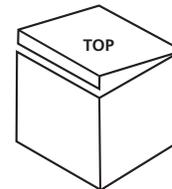

DirtCatcher

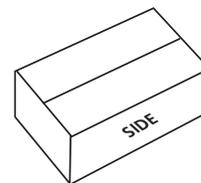

Labeling Information:

- Color Logos or custom labels can be added but will require additional time and added costs.
- Part Number and Code 39 barcodes are standard on all labels.
- Customers must supply us with high resolution artwork. Please supply finished logo with this form.
