## For Immediate Release

SCHROEDER INDUSTRIES INTRODUCES

### Mobile Filtration System-Basic Cart | MFDBC

June 2013 | Leetsdale, PA

Leetsdale, PA - Schroeder Industries, a recognized leader in filtration and fluid conditioning products, introduces its new Mobile Filtration System-Basic Cart | MFDBC, a compact, self-contained, "light-duty" filtration system.

For customers looking for a fast way to clean their hydraulic fluids, the MFDBC is a convenient, economical option equipped with high efficiency, high capacity elements capable of removing particulate and/or water contamination. These elements are equipped with patented, built-in seals engaged upon bowl installation. Standard bar indicators tell when elements require change-out. The MFDBC is also lightweight and includes a drip pan to catch any oil before it falls to the ground.

MFDBC

Utilizing our cartridge element (GH) filters, this cart offers superior filtration, dirt holding capacity and cost-saving replacement compared to that of typical spin-on filter systems. The dual filter assembly allows for water and particulate removal or staged, particulate contamination removal.

### About Schroeder Industries

Schroeder Industries, an ISO 9001: 2008 certified company, designs, manufactures and markets filtration products for the hydraulic and lubrication, filter systems, process and fuel industries. Their expertise in filtration technology, superior filter and element technology capabilities, dedication to customer service and product support are the reasons Schroeder is a worldwide leader in Advanced Fluid Conditioning Solutions™.
