

FEATURES  
&  
BENEFITS

MTS from Schroeder is an off-line filtration system that features membrane elements constructed of stacked disks where dirt holding capacity is measured in POUNDS instead of grams.

Separation efficiency is over 99.9% ( $\beta_{1000} > 1000$ ) in a single pass. Elements are available in 2, 10, 20, & 30 micron ratings

Most cost effective filtration solution per gram of dirt

The MTS can hold up to four filter elements and can be supplied as a stand-alone filter or with a pump and motor.

Effectively cleans hydraulic and cleaning fluids, lubricating oils, and coolants

Provides excellent dirt removal efficiency in single pass filtration

Extended element service life

Lower operating costs

Cleaner, more efficient systems

Available with pump and motor

APPLICATIONS

Filtration of fluids for hydraulic systems and test stands  
Filtration of cleaning fluids for parts washing machines  
Steel manufacturing factories  
Flushing and filling of OEM equipment  
Filtration of plastic injection molding equipment  
Gear Box Filtration  
Water Glycol Coolant Filtration
