Filter/Tank Optimization Services

- Allows a Schroeder Optimization Expert to visit your site and discover any cost-savings, or increased machine efficiencies within your hydraulic tank
- Cost-effective options for working within current system, or by means of creating a brand new system, to give you increased de-aeration, and reservoir volume reduction

Tank-Mounted Filter | ART

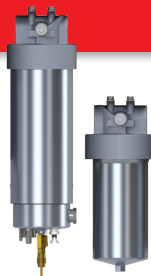

- Compact, lightweight, low pressure tank-mounted filter, ideal for mobile applications (e.g. front end loader)
- Lightweight, plastic bowl
- ART aluminum alloy is designed to be water tolerant - anodization is not required for use with water based fluids (HWCF)

DLP | Desiccant "Low-Profile" Breather

- Low-profile, high capacity design with low machine clearance dimensions in mind
- Prevents dirt and water vapor from entering vital hydraulic components
- Significantly improves the overall life of the equipment they're mounted on

GHCF + GHPF | GeoSeal® Coalescing & Dirt Removing

- Diesel fuel coalescing and particulate filters for fuel dispensing, transfer, or polishing applications
- Uses patented GeoSeal® elements
- Both housings are fully compatible with diesel and biodiesel blends up to B100
