BCC 100
Cold Clear™ Unit

Contamination happens.

Stored bulk biodiesel fuel can become contaminated by airborne dust and dirt, or any number of environmental conditions like cold weather.

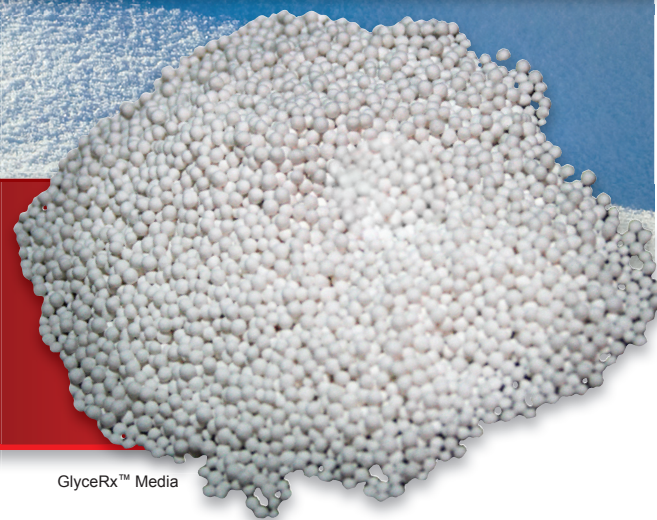

Cold Clear™

Maintain your fuel's integrity. Avoid jelling and expensive repairs to vital fuel and engine components by placing a **Cold Clear™** unit between your storage location and point of delivery.

GlyceRx™

Purify biodiesel with surface modified media, **GlyceRx™**. A direct replacement for resins that is specifically designed to absorb polar compounds, **GlyceRx™** is less costly, does not raise the FFA level and can be disposed of via landfill.

For more information on either of these products, please contact:
