

COME CLEAN.

Get the dirt out.

AutoFilt® RF3 Automatic Backflushing Filter

The rugged design reliably removes particulate contaminants from process water systems. Uninterrupted flow during element cleaning cycle reduces maintenance costs, increasing overall efficiency of operations.

The total filtration solution in one, small footprint.

- Flow rates up to 33,000 gpm
- Uninterrupted flow during element cleaning cycle
- Filtration down to 25 microns

HIGH VOLUME LOW MAINTENANCE

- Fully automatic operation with PLC control
- All metal components for long service life
- Virtually maintenance-free, with no consumable elements
